MANOGNA ADDANKI

Phone: +91 8919046562

Email: manogna.addanki_2026@woxsen.edu.in

Github: https://github.com/manognaa28

LinkedIn:https://www.linkedin.com/in/manogna-addanki-38b938255/

TECHNICAL SKILLS

- Languages: Python, Java, JavaScript, C++
- Machine Learning: Scikit-learn, Classification Models, Model Evaluation
- Computer Vision: CNN, TensorFlow, Keras, Image Classification
- Data: Pandas, NumPy, Power BI, Excel
- APIs: HTTP, REST APIs
- Databases: MySQL, MongoDB
- Tools: Git, GitHub, Jupyter, Docker
- Web: HTML, CSS, React, Node.js

SOFT SKILLS

- Problem Solving
- Collaboration
- Communication Skills
- Analytical Thinking
- Attention to detail.

EDUCATION

B.Tech, Computer Science, 2022- 2026
Specialization : CSE - Core
Woxsen University, India
CGPA: 3.19/4

CERTIFICATIONS

- Generative AI for Everyone – Coursera
- Exploratory Data Analysis for Machine Learning – Coursera
- Data Mining Methods – Coursera
- Data Analysis & Visualization with Power BI – Coursera
- React Basics - Coursera

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands on experience in Machine Learning, Deep Learning, and AI driven applications. Skilled in building and evaluating models using Python, TensorFlow, and data analysis techniques. Experience in healthcare AI, and workflow automation using APIs. Strong foundation in data preprocessing, exploratory data analysis, and model performance evaluation. Passionate about developing AI solutions that solve real world problems.

KEY PROJECTS

SereneMinds - Detection Of Schizophrenia Using AI(2024)

Tech Stack: Python, Machine Learning, MERN, MongoDB.

- Built an AI based mental health assessment system for early risk prediction.
- Performed EDA and feature engineering to identify key patterns and improve model performance.
- Ensured reliable data flow between model, API, and database.

Image Classification Project(2025)

Tech Stack: Python, TensorFlow, Keras

- Designed and trained a Convolutional Neural Network (CNN) for image classification.
- Performed dataset preprocessing and normalization.
- Evaluated model performance using accuracy metrics and multiple validation runs.
- Improved model consistency through repeated testing.

SDR Workflow Automation Agent(2025)

Tech Stack: Python, REST APIs,

- Built an automated AI workflow integrating multiple APIs for lead processing.
- Implemented data validation, error handling, and failure scenario testing.
- Designed automation pipelines for efficient data flow across systems.

Billionaire's Analytics Dashboard(2024)

Tech Stack: Power BI, Data Cleaning (Excel/CSV), Visual Design

- Performed data cleaning and transformation on raw datasets.
- Created interactive dashboards to derive business insights.
- Applied EDA techniques to support strategic decision-making.

W-The App(2024)

Tech Stack: HTML, CSS, JavaScript.

- Contributed to a campus wide mobile application by designing and implementing a sports facility booking feature.

INTERESTS

- Sketching
- Reading
- Visual Brainstorming
- Journaling

LANGUAGES

- English (Advanced)
- Hindi (Advanced)
- Telugu (Advanced)
- Spanish (Basic)

RESEARCH

NextGen Tech 2024 – Eudoxia Research Centre

- Contributed to research on bipolar disorder using data analysis and literature review.
- Collaborated with cross-functional teams to support AI-driven healthcare insights.

ACHIEVEMENTS

- Winner – NEXTINTECH Hackathon 2024, built a technology solution under tight timelines with rapid feature prioritization.
- Executive Member – COE (Cybersecurity & Quantum Computing), supported technical initiatives and peer learning sessions.
- Content Writer – Woxsen Times, wrote articles on technology trends and industry developments.
- Solved 40+ algorithmic problems on LeetCode
