SKILLS

- **Data Analysis and Visualization:** Power BI, Excel
- **Databases:** SQL, MongoDB
  Languages: Python
- **Web Technologies**: Html, CSS, React.
- **Collaboration**: Git

EDUCATION

B.Tech, Computer Science, 2022-2026
Woxsen University, India
CGPA: 2.40/4

CERTIFICATIONS

- Data Analysis and Visualization with Power BI - Microsoft
- Exploratory Data Analysis for Machine Learning - IBM
- Dynamic Programming, Greedy Algorithms - University of Colorado Boulder
- Generative AI for Everyone - DeepLearning. Ai
- Agile Scrum in Practice - Infoys
- OpenAI Generative Pre-trained Transformer 3 - Infosys

PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student at Woxsen University, Hyderabad.Passionate about turning data into actionable insights and using modern technologies to create meaningful and scalable software solutions.

KEY PROJECTS

MY WOX - Website

- Developed a web-based bus ticket booking system tailored for University students and faculty using HTML, CSS, JavaScript (Frontend) and Java with MySQL (Backend).
- Designed and implemented a user-friendly interface for online seat reservations, e-ticket generation, and real-time booking status.
- Built and managed a robust MySQL database to store user profiles, trip schedules, and seat assignments with data integrity and relationship mapping via ER modeling.

Uni-Grip

- Developed a full-featured Learning Management System (LMS) designed to streamline university operations like attendance tracking, assignment uploads, result sharing, and exam management.
- Integrated modules such as a timetable viewer, enhancing academic collaboration and communication.
- Built using the MERN stack (MongoDB, Express.js, React, Node.js) with Nodemailer for real-time email notifications.

Coddy – Social Platform for Coding Collaboration

- Developed a web-based platform to build a community of coders focused on learning, collaboration, and friendly competition.
- Implemented user features like authentication (Sign up/Login), profile creation, leaderboards, and streak tracking to enhance engagement.
- Integrated APIs from popular coding platforms such as LeetCode, HackerRank, and Codeforces for seamless challenge access and progress tracking.

INTERESTS

- Listening to music
- Traveling
- Cycling
- Badminton
