Academics

Woxsen University | Hyderabad

2022 - 2026 |**Bachelor of Technology - 2.7/4.0**

Alphores Junior College | Karimnagar

2020 - 2022 |Intermediate **- 70%**

Alphores High School | Karimnagar

2019 - 2020 | Schooling **- 98%**

Skills

- Languages: Python, HTML / CSS, Java Script, SQL
- Data Analysis & Visualization
- Machine Learning & Deep Learning
- Computer Vision
- Database Management
- Neural Networks
- Data Structures & Algorithms
- Natural Language Processing (NLP)

Tools

- My SQL
- TensorFlow, PyTorch
- OpenCV
- Transformers
- Matplotlib, Seaborn
- API's

Languages

- English - Fluent
- Telugu - Fluent
- Hindi. - Fluent

Professional Skills

- Flexible
- Planning and Coordination
- Teamwork and Collaboration
- Quick learner, positive attitude
- Full commitment to work
- Good decision making and analytical skills

Objective

A passionate Computer Science and Engineering (AI & ML) student with a strong foundation in Python programming. Experienced in Machine Learning, Deep Learning models, and Data Structures & Algorithms through academic projects. Skilled in building CNN-based models, software solutions, and algorithm optimization for practical applications. Interested in Computer Vision, Natural Language Processing, and data-driven problem-solving to develop innovative AI solutions.

Projects

Project 1 - Sign Language Detection - 2023

- Developed a real-time sign language recognition system using CNN-based deep learning models.
- Achieved high accuracy in gesture classification using a custom-built dataset and OpenCV for hand tracking.
- Designed an interactive web application for seamless user experience and accessibility.

Project 2 - House Price Prediction using TF-DF - 2024

- Built a house price prediction model using TensorFlow Decision Forests (TF-DF) with a Random Forest approach.
- Trained on real estate datasets, optimizing for predictive accuracy with feature engineering and hyperparameter tuning.
- Developed a streamlined interface for interactive price estimation and analysis.

Project 3 - Mental Health Chatbot - 2024

- Developed an AI-powered mental health chatbot using OpenAI API for dynamic and context-aware responses.
- Integrated retrieval-based techniques to enhance conversational depth and relevance.
- Improved UI/UX for an intuitive user experience and deployed the system using Flask and Firebase.
- Optimized for scalability and real-time interaction, ensuring reliable and accurate mental health support.

Project 4 - Retrieval Augmented Generation (RAG) QA Bot - 2024

- Developed a business-focused QA bot using OpenAI API and PineconeDB for efficient vector search.
- Trained on the SQuAD dataset to improve context-aware retrieval and answer generation.
- Implemented RAG architecture to enhance retrieval accuracy and provide precise, real-time responses.
- Optimized prompt engineering and fine-tuned embeddings for better knowledge retrieval.

Certifications

- |2023|Introduction to Artificial Intelligence - Coursera
- |2023|Data Structures - Coursera
- |2023|Introduction to Deep Learning & Neural Networks with Keras - Coursera
- |2023|Databases and SQL for Data Science with Python - Coursera
- |2023|Introduction to TensorFlow for Artificial Intelligence, Machine Learning, and Deep Learning - Coursera
