Academics

Woxsen University | Hyderabad *2022 - 2026*
|**Bachelor of Technology - 3.2/4.0**

JOHNSON GRAMMAR SCHOOL
NACHARAM *2020- 2022* | ISC **– 83%**

ST. ANNS HIGH SCHOOL -SECUNDERABAD
2009 - 2020 | Schooling **- 87%**

Skills

- Programming Languages:
- Python,SQL,JavaScript,HTML,CSS,Java
- Data Structures & Algorithms
- Machine Learning
- Natural Language Processing
- Deeplearning & Neural networks

Tools

- Anaconda(Python)
- Programming Platforms(eg.GoogleColab, Visual Studio)
- Machine Learning Libraries(Sklearn,numpy,pandas,matplotlib,tensorflow)
- Weka (Data Mining)
- XAAMP

Languages

- English - Fluent
- Hindi - Fluent
- Telugu - Fluent

Professional Skills

- Team Collaboration
- Adaptability
- Communication Skills
- Time Management
- Risk Management
- Decision-Making

Objective

Passionate about AI and machine learning research, with a keen interest in deep learning and NLP. Eager to explore AI applications, contribute to research projects, and advance knowledge in artificial intelligence. Interested in experimenting with novel architectures, optimizing model performance, and applying AI to real-world challenges. Looking for opportunities to collaborate on innovative projects, gain hands-on experience with emerging technologies, and stay at the forefront of AI advancements..

Projects

Graphical Password authentication[2025]

- A system that enhances security and memorability by using two user-selected images instead of traditional text-based passwords.
- Users authenticate by selecting the correct images and predefined cued points within a **3×3** grid.
- Additional security features include **a** 15-second session timeout and a reset mechanism for incorrect attempts.

Weed Classification Using deep learning models [October 2024]

- Developed a weed classification model using machine learning and deep learning techniques with the DeepWeed dataset.
- Implemented and evaluated multiple architectures, achieving 97% accuracy with CNN, 82% with MobileNetV2, and 79% with DenseNet.
- Optimized model performance through feature extraction, data augmentation, and hyperparameter tuning to enhance classification accuracy under varying conditions

Salary Prediction using Machine Learning [November 2024]

- Developed a machine learning model for salary prediction, achieving 88% accuracy with Random Forest, 86% with Multiple Linear Regression, and lower accuracy with Decision Tree.
- Optimized performance through data preprocessing, feature selection, and hyperparameter tuning while evaluating results using RMSE and R^2 scores.

Smart system for stock management [April 2024]

- The smart stock management system autonomously monitors inventory levels and detects when replenishment is needed.
- It efficiently calculates the shortest path to the desired location for restocking, reducing time and resource consumption.
- By minimizing human intervention and optimizing stock movement, the system enhances operational efficiency and lowers costs

Certifications

- |2023-11|Introduction to Aritificial Intelligence- Coursera
- |2024-03|Introduction to Deep Learning &Neural Netwrok keras Coursera
- |2024-04|Introduction to TensorFlow for AI,ML,DL- Coursera
- |2024-04|Operating System Fundamentals – Coursera
- |2024-04|Introduction to Programming – Kaggle
- |2024-03|HackSavy- Hackathon
