Education

- **Woxsen University** — Hyderabad, India
  Bachelor of Technology - Computer Science and Engineering; GPA: 3.20/4.0 — *2022 – 2026*
- **Vikas The Concept School — Hyderabad** — Hyderabad, India
  Central Board of Secondary Education – 12th (MPC) — *2020 – 2022*
- **Surya The Global School — Hyderabad** — Hyderabad, India
  Central Board of Secondary Education -10th (CBSE) — *2019 – 2020*

Skills Summary

- **Languages**: Python, Java (Basic), C++ (Basic), JavaScript, HTML, CSS, SQL
- **Frameworks**: Scikit-learn, Flask, NumPy, Pandas, Matplotlib
- **Tools**: Power BI, Excel, MySQL, Microsoft SQL Server, Git
- **Coursework**: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision
- **Soft Skills**: Problem Solving, Communication, Time Management, Self Learning, Analytical Thinking

Work Experience

- **Bluestock Fintech – Hyderabad, India** — Jan 2025 – Mar 2025
  Software Development Engineer (Intern) — *Remote*
  - **Project**: Developed a production-level IPO web application and REST APIs to manage and display IPO-related data for fintech users
  - **Tools & Technologies**: Django, Django REST Framework, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, Postman, Git
- **AI Research Centre, Woxsen University – Hyderabad, India** — Feb 2025 – May 2025
  Research Intern — *Hybrid*
  - **Project**: Participated in the drafting of academic research papers on data privacy, ethical AI implementation, and strategies to reduce algorithmic bias.
- **Diebold Nixdorf Pvt Ltd – Mumbai, India** — Sept 2025 – Nov 2025
  AI&ML (Intern) — *On-site*
  - **Project**: Worked on fine-tuning the AutoBolt project, resolving workspace-level issues within the Agentic AI platform, and conducting end-to-end testing of all Agentic AI functionalities to ensure system reliability and performance.
  - **Tools & Technologies**: Python, AutoBolt framework, Agentic AI Platform, LLM fine-tuning tools, Vector Databases, REST APIs, Git, Debugging/Monitoring tools, Postman, VS Code.

Projects

- **Spark Detection** — May 2024 – July 2024
  Real-Time Industrial Safety using Audio Signals
  - **Description**: Designed a deep-learning-based system to detect spark events from audio data in industrial environments to prevent hazards
  - **Key Features**: Used CNN Models for high accuracy, and proposed multi-model enhancements with video inputs.
  - **Technologies**: Python, TensorFlow, CNN, Audio Processing
- **Path Planning for AI Agent using Reinforcement Learning** — Aug 2024 – Sep 2024
  Autonomous Navigation in Dynamic Environments
  - **Description**: Created a dynamic navigation model using Reinforcement Learning combined with the Rapidly-exploring Random Tree (RRT) algorithm.
  - **Key Features**: Enabled real-time simulation in complex maps, suitable for robotics and self-driving use cases.
  - **Technologies**: Python, RL, RRT Algorithm, Simulation
- **Fine-Tuning LLMs for Synthetic Data Generation** — Nov 2024 – Jan 2025
  Data Augmentation System for AI Models
  - **Description**: Built a pipeline to fine-tune large language models for generating realistic synthetic datasets to improve ML models training in data-scarce scenarios.
  - **Key Features**: Employed Hugging Face Transformers, statistical evaluations, and ethical safeguards for responsible AI.
  - **Technologies**: Python, Hugging Face, Transformers, data Augmentation
- **Post-Disaster Management System** — Feb 2025 – Apr 2025
  AI-Powered Survivor Detection and Rescue Support
  - **Description**: Engineered a system for identifying survivors in disaster zones using lightweight detection models and automated alerting tools.
  - **Key Features**: Deployed YOLOv4-Tiny/MobileNet SSD on Raspberry Pi with image posting automation to Instagram for rescue Support.
  - **Technologies**: Python, OpenCV, TensorFlow, Raspberry Pi, Instabot

Certifications

- **Deep Learning Specialization- Coursera:** Apr 2025
- **Python for Machine Learning - Coursera**: Mar 2024
- **Data Structures - Coursera**: Sep 2023

- **Data Analytics – Udemy:** Dec 2024

ACHIEVEMENTS

- National Level Hackathon on Generative AI – 2nd Prize (Nalla Narasimha Reddy Group of Institutions (NNRG) College, Hyderabad)
- Hackinfinity State-Level Hackathon – 2nd Prize (Pallavi Engineering College, Hyderabad)
- VIVITSU – Consolation Prize (Gokaraju Rangaraju Institute of Engineering & Technology (GRIET)), Hyderabad
