NIKUNJ GUPTA

ASPIRING ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING DEVELOPER

Phone: +91 8179367637

Email: nikunj.gupta_2026@woxsen.edu.in

Github: github.com/nikgup6

LinkedIn: linkedin.com/in/nikunj-gupta-b66b94258

Portfolio: https://nikunjgupta.me/

TECHNICAL SKILLS

- **Languages**: Python, JavaScript, Java, SQL
- **Web Technologies**: HTML5, CSS3, Node.js, Express.js, React.js, React Native, Flask, REST API's, Java Spring-boot.
- **Machine Learning**: Scikit-learn, TensorFlow, Keras, LLM, DL
- **Tools**: Git, Github, Jupyter, Postman
- **Databases**: MySQL, MongoDB, PG
- **Cloud**: AWS, Render, Vercel
- **Embedded & IoT Systems:** Raspberry Pi, SpeechRecognition API, Real-Time Processing.

EDUCATION

B.Tech, Computer Science, 2022- 2026
Specialization : AI & ML
Woxsen University, India
CGPA: 3.72/4

Student Exchange Program
Ajman University, UAE
Selected among top 5% for a semester-long academic immersion program; achieved a GPA of 3.89/4.0.

Intermediate Science Stream CBSE, 2020- 2022
RMK Residential Senior Secondary School
Chennai, Tamil Nadu
Percentage: 89%

PROFESSIONAL SUMMARY

Results-driven AI & Machine Learning Developer with a strong foundation in full-stack web development, cloud deployment, and intelligent systems integration. Spearheaded 6+ impactful projects, including crisis prediction systems, real-time subtitle devices, and eco-friendly smart cab platforms. Adept at building scalable React/Node.js apps and deploying ML models using TensorFlow, PyTorch, and LLMs. Proven ability to collaborate with cross-functional teams, optimize performance, and deliver user-focused solutions with measurable outcomes. Seeking opportunities to drive innovation through AI-driven problem solving and robust software engineering.

EXPERIENCE

Wordpress Website Developer Intern | Rishmay Group,USA
July 2023 - Aug 2023

- Built and deployed **3+** WordPress **websites** for NGOs and NRI clients, resulting in a **70%** improvement in online engagement.
- Collaborated with international teams to define UI/UX requirements and streamline feedback loops.
- Mentored by a Google engineer on code review best practices, accessibility standards, and scalable site architecture.

Full Stack Developer Intern | AI Research Center, Woxsen University
Jan 2025 – Present

- Engineered a cross-platform ERP portal using React Native and Node.js, reducing student-admin communication delays by **40%.**
- **Designed** RAG-based AI chatbots for academic use, increasing **query resolution** efficiency by **55%**.
- Developed a 3D model generation system from 2D image groups using computer vision, enabling automated 3D reconstruction.
- Collaborated with UI/UX teams to enhance user experience, reducing navigation errors by **30%**.

SDE Intern | Efundzz, Bangalore
Feb 2025 – March 2025
Link- Elephant Loans

- Designed and launched a dynamic React-based customer acquisition platform for Elephant Loans, improving site engagement by 35%.
- Integrated machine learning models to assess user loan eligibility, reducing manual evaluation time by 60%.
- Conducted QA and A/B testing to ensure bug-free deployment and enhance conversion rates by 22%.
- Documented key workflows and optimized the backend API structure for easier future maintenance and scalability.

AIE Intern | Techsophy, Hyderabad
Sep 2025 – Present

- Working in the field of backend Java Spring Boot.
- Continuously applying techniques and concepts on Live projects.
- Working on HIMS portal backend developement.
- Hands on with API's, keycloak, PostgreSQL and ML.

INTERESTS

- Competitive Coding
- Cooking
- Sports
- Dance
- Travel
- Teaching
- Graphic Designing

LANGUAGES SPOKEN

- English
- Hindi
- Telugu
- Tamil

CERTIFICATIONS

- AWS Cloud Computing Academy Graduate (Jan 2024)
- Introduction to LLM by Google (Jun 2025)
- Introduction to GenAI by Google (Sep 2024)
- Prompt Engineering by Deep Learning (Sep- 2025)

KEY PROJECTS

Emergency Prediction System - NLP-Based Crisis Detection
Tech Stack: React Native, Node.js, Express.js, MongoDB, REST API, NLP, BART

- Trained a BART-based NLP model on emergency datasets to classify crisis-related user input with **91%** accuracy.
- Integrated real-time sentiment and intent analysis to trigger instant alerts for potential emergencies.
- Deployed on mobile platforms with an intuitive UI for quick access in high-stress scenarios.

Transcribe Glasses - Real-Time Speech-to-Text Subtitling
Tech Stack: Python, TensorFlow, SpeechRecognition API, Embedded Systems, IoT devices (Raspberry Pi)

- Developed a wearable smart glasses solution for hearing-impaired individuals using deep learning STT models.
- Achieved transcription latency under 300ms, ensuring natural and readable subtitle output.
- Deployed using Raspberry Pi for edge processing, reducing dependence on cloud latency.

Smart Cab - Sustainability & UX-Focused Transport Solution
Tech Stack: React.js, Node.js, Socket.io, MongoDB, Flask, OpenStreetMap, TensorFlow

- Designed a cab booking system integrating real-time tracking, walkable route suggestions, and sustainability rewards.
- Improved trip route optimization by **18%,** reducing carbon footprint through AI-driven voluntary walking segments.
- Added “food-on-the-way” and step-count-based incentives, enhancing UX and promoting eco-conscious travel behavior.

Chronic Disease Risk Predictor - ML-Based Health Monitoring Tool
Tech Stack: Python, Scikit-learn, Pandas, Flask, React.js, NHANES Dataset

- Link- Chronic Disease Prediction
- Built a machine learning app that evaluates chronic disease risks based on user inputs.
- Achieved 87% model accuracy in predicting diabetes, heart disease, and hypertension using NHANES data.
- Implemented real-time result visualization with interactive risk indicators and health suggestions.

LEADERSHIP AND ACHIEVEMENTS

- **Chair, IEEE Woxsen University (2024–Present)**
- Led a team of **25+** members, increasing student participation in tech communities by **200%**.
- **President, Baudhik Club (Institution’s Innovation Council)**
- Spearheaded idea-stage mentorship programs and startup pitch sessions, helping 5+ student ventures move into prototype stages.
- **Executive, Russell Belk International Relations Cell**
- Facilitated international academic collaborations with international institutions and ambassadors.
- **Core Member, Programming Club – Code{X}**
- Organized weekly coding challenges and mentorship sessions; contributed to improving coding contest participation rates by 3x.
