HEMANTH KUNCHAM

ASPIRING DATA SCIENTIST

Phone: +91 7330994353

Email: hemanthkuncham8055@gmail.com

Github:https://github.com/hemanth-source

LinkedIn: www.linkedin.com/in/hemanth-kuncham

SKILLS

- **Languages**: Python, JavaScript, Java, SQL .
- **Web Technologies**: HTML5, CSS3,

- **Machine Learning**: Scikit-learn, TensorFlow, Keras
- **Tools**: Git, GitHub, PowerBI.
- **Databases**: MySQL, MongoDB
- **Other** : Problem Solving, Collaboration, Critical Thinking, Team leading

EDUCATION

B.Tech, Computer Science, 2022- 2026
Specialization : DATA SCIENCE
Woxsen University, India

Higher Secondary, 2020- 2021
Specialization : MPC DAV Public School, India

CERTIFICATIONS

- Introduction to Generative AI
- Data Science for engineers - NPTEL
- CHATGPT for Beginners: Sc Fi Writing with Dall-e -Coursera

PROFESSIONAL SUMMARY

Aspiring Data Scientist and ML Enthusiast with hands-on experience in Python, machine learning, and full-stack web development. Proficient in building scalable, AI-driven solutions using TensorFlow, PyTorch. Skilled in data analytics, statistical modeling, and cloud-based deployments. Passionate about solving real-world problems through intelligent systems and continuously enhancing technical expertise. Actively seeking opportunities to contribute, innovate, and grow in a dynamic, data-driven environment.

INTERNSHIPS

Data ScienceIntern | ApexIQ.ai, Bengaluru
May 2025 – Present

- Designed and built a full-stack web application featuring a talking 3D avatar.
- Created a visually immersive frontend using React Three Fiber, rendering a 3D avatar (Ready Player Me) with dynamic lip-syncing.
- Implemented an audio-driven animation system where the 3D avatar's facial morph targets (visemes) are animated in real-time based on TTS audio buffers.

Full Stack Developer Intern | ZIdio, Pune
May *2023 – July 2023*

- Developed a sentiment analysis model and **deployed** it using FastAPI on AWS.
- **Collaborated** with a team of 3 to preprocess customer feedback data using Python and NLP techniques.
- Reduced manual review time by **50%** by integrating the model into an internal dashboard for real-time insights.

KEY PROJECTS

Plant DiseaseDetection
Tech Stack: YoloV8, HTML, JavaScript, MYSQL, Raspberry pi, Python
October – *November 2023*

- **Developed** a real-time plant disease using YOLOV8, integrating an FPV Camera For Live stream analysis for instant disease detection.
- **Optimized** YOLOv8 using transfer learning and hyperparameter tuning for high-accuracy, low-latency detection on Jetson Nano.
- **Developed** an end-to-end pipeline for real-time image-based disease detection withmodel inferenceand resultvisualization,deployedas a web for farmers.

Autonomous Precision Spraying Drone
Tech Stack: Python, YOLOV8, ArduPilot , Mission Planner
September– *December 2024*

- **Developed** an autonomous precision spraying drone using GPS and AI-driven path planning to optimize efficiency and reduce chemical waste.
- **Integrated** machine learning and IoT for real-time crop health detection, adaptive spraying, and remote monitoring.
- **Implemented** LiDAR-based obstacle avoidance and energy-efficient battery management for extended autonomous operation

INTERESTS

- Building IOT project
- Tech Blogging/Reading
- Team Sports

LANGUAGES

- English
- Telugu
- Hindi

RESEARCH & PUBLICATIONS

- Co-developed a vehicular network-based real-time climate data sharing system to enhance road safety, integrating GPS, weather sensors, and camera modules. Featured in Patentability Search Report (Ref. WU.10067), July 2025.

ACHIEVEMENTS

- Second Runner-Up, 24 hr coding hackathon, MGIT hacksavvy24-1
- Volunteer– Utopia esports, Woxsen University
- HackFusion hackthon Runner-up
- Futher Tech Sumit'25 Runner-up
- NPTEL Data Science Securing Sliver Rank.
