Academics

Woxsen University | Hyderabad
2022 - 2026 |**Bachelor of Technolog-3.36/4**
Sri chaitanya Junior College | vijaywada
2020 - 2022 ***Intermediate- 97%***
The Nandyal public **School | Nandyal**
2019 - 2020 - 91%

Skills

- Programming Languages: Python, Java
- Data Analysis & Visualization
- Machine Learning & Deep Learning
- Computer Vision
- Database Management
- Neural Networks
- Data Structures & Algorithms
- Natural Language Processing (NLP)

Tools

- SQL & MongoDB
- Machine Learning Libraries
- Cloud Platforms (e.g., AWS for database integration)
- Power BI/Tableau
- Excel

Languages

- English - Fluent
- Telugu - Fluent
- Hindi - Fluent

Professional Skills

- Flexible
- Planning and Coordination
- Teamwork and Collaboration

Objective

A passionate and solution-focused contributor with a strong foundation in Python, data analysis, and machine learning. Enjoys transforming real-world challenges into practical, data-driven solutions. Skilled at communicating complex ideas clearly and working collaboratively across technical and non-technical teams. Seeking an opportunity to contribute meaningfully, grow continuously, and thrive in a dynamic, innovation-driven environment.

Projects

Project-1-DeepChat- RAG-Customizable- chatbot with API and LLM Jan2025-April 2025

https://github.com/tanguturiharsha-1810/Deepchat_LLM

- Built a customizable chatbot for intelligent document interaction using fine-tuned LLMs and RAG.
- Optimized performance with LoRA fine-tuning and 4-bit quantization, reducing model size by 70%.
- Enabled PDF/TXT upload, summarization (with OCR), and interactive document-based Q&A.
- Integrated semantic search and document management for efficient information retrieval and control.

Project- 2- Flood prediction and alert system-July 2024 - November 2024

https://github.com/tanguturiharsha-1810/Store-Sales-and-Profit-Analysis-

- Developed a Flood Prediction web user interface using HTML, CSS, JavaScript, and Bootstrap.
- Designed the UI to be easily integrated with backend Machine Learning (ML/AI) projects.
- Integrated free WeatherAPI and browser GeoLocation API to fetch and display the user's current location weather data.
- Created a user-friendly and responsive interface for real-time flood prediction insights.

Project - 3-- Store sales and profit analysis- January - April 2024

https://github.com/tanguturiharsha-1810/Store-Sales-and-Profit-Analysis-

- Conducted comprehensive analysis of store sales and profits to identify key drivers of revenue and profitability.
- Utilized data exploration and visualization techniques to uncover meaningful insights.
- Delivered actionable recommendations to improve business performance based on findings.

Project - 4 - Fake News Detection July - November 2023

https://github.com/tanguturiharsha-1810/Fake-news-detection

- Developed a machine learning model to accurately detect and classify fake news articles.
- Focused on combating misinformation and promoting responsible media consumption.
- Analyzed data thoroughly to improve model performance and reliability.

Project -5 -Blood Bank Website Jan2023-April2023

https://github.com/tanguturiharsha-1810/Blood-Bank

- Designed a web-based platform connecting hospitals and receivers for blood sample management.
- Enabled hospitals to add and manage available blood samples in their blood bank.
- Allowed receivers to search for and request required blood samples through the system.
- Built using HTML, CSS, Bootstrap, and JavaScript for the frontend, with PHP and MySQL handling backend and database operations.

Certifications

Hackathon Social Implusum 4.0|180 degrees Consulting IIT Madras
TechVortex 2.0 An Internationl project competition| symbiosis Institute Of Pune
Hackathon Innovate and Inspire|K.Rama Krishna College Of Engineering
Coursera | Whai is DataScience ? Coursera | Introduction to nosql Databases
Coursera | Introduction to Artificial Intelligence
Coursera | Introduction to Object-Oriented Programming with Java
Coursera | Core Java
Coursera | Algorithms for Searching, Sorting, and Indexing
Coursera | Dynamic Programming, Greedy Algorithms
