SUCHITH VILLURI

ASPIRING DATA SCIENTIST

Phone: +91 6281694193

Email: Suchith.V_2026@woxsen.edu.in

Github: github.com/SuchithVilluri

LinkedIn: linkedin.com/in/suchith-villuri/

SKILLS

- **Languages**: Python, JavaScript, Java, SQL
- **Web Technologies**: HTML5, CSS3, Node.js, Express.js, React.js
- **Machine Learning**: Scikit-learn, TensorFlow, Keras
- **Tools**: Git, Docker, AWS, Jupyter
- **Databases**: MySQL, MongoDB
- **Other** : Problem Solving, Collaboration

EDUCATION

B.Tech, Computer Science, 2022- 2026
Specialization : Data Science
Woxsen University, India

CGPA: 8.5/10

CERTIFICATIONS

- Programming with JavaScript, HTML, and CSS
- Core Java Specialization
- Data Structures
- Algorithms for Searching, Sorting, and Indexing
- Data Science for Engineers - NPTEL

PROFESSIONAL SUMMARY

Data Science Enthusiast with hands-on experience in data analysis, machine learning, and end-to-end model deployment. Skilled in extracting insights from complex datasets and building predictive models to solve real-world problems with accuracy and impact.

INTERNSHIPS

Research Intern | SRASYSInc, Bangalore

Feb 2025 - June 2025

- Built and deployed machine learning models for anomaly detection and computer vision tasks during my research internship at SRASYS.
- Collaborated closely with a team to preprocess real-world sensor and image data using advanced data processing and computer vision techniques.
- Improved analysis efficiency by integrating ML outputs into clean visual dashboards, reducing manual effort and enhancing decision-making speed.

KEY PROJECTS

Football Pose Estimation & Action Captioning

Oct *2025 - Dec 2025*

- Built multi-model pose estimation pipeline using HRNetSimple & PoseGraph GNN, trained on Football5907 with Mediapipe-generated annotations.
- Enhanced joint detection performance, achieving 92.56% PCK accuracy with GNN compared to HRNet baseline.
- Integrated BLIP for action captioning, generating semantic descriptions from extracted player pose keypoints.

Creation of an In-Depth Match Report for EURO Finals 2024:

Jun 2024 - July 2024

- Analyzed and generated a match report for the EURO Finals 2024, highlighting key statistics and insights.
- Utilized advanced metrics like xG, passing networks, and heatmaps to break down team strategies. Focused on key turning points and player impact throughout the match.
- Presented insights through visual dashboards and concise summaries. Report offered clear takeaways for analysts, fans, and tactical discussions.

INTERESTS

- Algorithmic Thinking
- Visual Data Sketching
- Collaborative Debugging
- Competitive Coding
- Tech Blogging/Reading
- Team Sports

LANGUAGES

- English
- Hindi
- Telugu
- French

LEADERSHIP AND ACHIEVEMENTS

- **Executive, Centre of Excellence for Sports Analytics , 2023–Present**

  Led and supported initiatives in event planning, marketing, and data-driven sports analysis. Collaborated on research-driven projects aimed at promoting innovation in sports technology.

- **Class Representative – B.Tech CSE (DS), 2023–2024**

  Acted as a key liaison between students and faculty, facilitating communication, coordinating academic updates, and representing student interests in departmental meetings.

- **Finalist, OIST National Hackathon 2024**

  Selected as one of the top teams out of 620+ participants nationwide. Developed an AI-powered solution addressing real-world problems, demonstrating innovation, scalability, and teamwork under pressure.

- **Top 10 Finalist, Case Crunch 2.0 – International Strategy Consulting Board (ISCB), 2024**

  Selected among 85+ teams and 400+ participants in a global 24-hour case competition. Advanced to the Business Round by delivering strategic insights and interdisciplinary solutions.

- **4th Place, National Hackathon – Woxsen University, 2025**

  Secured 4th place among top national teams by developing a sustainable, tech-driven solution under time constraints, highlighting strong problem-solving, collaboration, and presentation skills.
