SATYA VAISHNAVI GUMPALLY

ASPIRING SECURITY ANALYST

Phone: +91 9959184011

Email: satyavaishnavig@gmail.com

Github: github.com/vaishnavi0307

LinkedIn: linkedin.com/in/satya-vaishnavi-gumpally-3b5363324/

SKILLS

- **Languages**: Python, SQL
- **Web Technologies**: HTML, CSS, Bootstrap
- **Databases**: MySQL, MongoDB
- **Other Tools & Technologies:** Kali Linux, Splunk, Autopsy, PuTTY, Arduino IDE, MCP, Cursor IDE, Vercel, Git, Docker, Jira
- **Soft Skills:** Communication, Documentation, Leadership, Collaboration, Team Management

EDUCATION

B.Tech, Computer Science, 2022-2026
Specialization: Blockchain, IoT, Cybersecurity
Woxsen University, India
CGPA: 3.63/4

CERTIFICATIONS

- Mastermind: ISO/IEC 27001:2022 Lead Auditor Certification
- TryHackMe: Pre Security Certificate
- LetsDefend.io: Splunk (Badge: Splunk Engineer)
- INFOSEC: Cyber Threat Hunting
- Packt: Certified Ethical Hacker (CEH)
- Forage: Mastercard - Cybersecurity Job Simulation
- Forage: Tata - Cybersecurity Security Analyst (IAM) Job Simulation

PROFESSIONAL SUMMARY

Cybersecurity enthusiast with hands-on exposure in security auditing, vulnerability analysis, penetration testing, switch configuration, and incident response using Splunk. Skilled in developing tools like automated security auditing and ISO 27001 mock auditing tools, system security analyzers, and port scanners, with foundational knowledge of digital forensics tools such as Autopsy. Also have hands-on knowledge and exposure in Quality Assurance engineering, including manual testing, automation testing using Selenium (Python), PyTest, and API testing with Postman to ensure application quality and reliability. Passionate about securing enterprise systems and eager to apply problem-solving skills while staying ahead of emerging cybersecurity trends.

INTERNSHIPS

Cyber Security Intern | DRDO, Hyderabad (Hybrid)
May 2025 – November 2025

- Enhanced infrastructure security by providing implementation solutions for AD groups and policies, server configurations, and patch management workflows.
- Configured and secured Netgear switches and conducted security testing like Port Binding to improve network reliability.
- Performed security audits on **10+** Windows & Linux systems, covering port scans, vulnerability checks, event logs, external devices, and policy compliance.
- Developed an automated Windows Auditing Tool, reducing manual audit time by **60%** and improving security reporting accuracy.
- Supported low-severity incident investigations, documenting findings and recommended remediations.

Data Engineer Intern | Opplane, Portugal (Remote)
April 2024 – August 2024

- Contributed to the company's data acquisition processes by developing and optimising **200+** Python-based web scrapers for U.S. and Singapore websites using APIs, Scrapy, Selenium, and XML sitemaps.
- Enhanced scraping efficiency and data accuracy through integrating various methods and performance tuning.
- Collaborated using GitHub, Bitbucket, and Docker, gaining hands-on experience with version control and containerization tools.

KEY PROJECTS

Mock ISO 27001 Audit Policy and Gap Assessment
Tech Stack: AI, Python, React, TypeScript, Vite, Tailwind CSS, Supabase
August 2025 - October 2025

- Developed a web-based ISO 27001 Compliance Portal to automate internal audits and highlight ISMS policy gaps.
- Integrated an AI text-analysis module to scan audit reports, detect non-conformities, and suggest remediation steps.
- Improved audit efficiency by reducing manual checks and speeding up ISO 27001 readiness for organisations.

Windows Endpoint Risk Assessment & Security Scanner
Tech Stack: Python
January 2025 – April 2025

- Built an automated security scanner to analyze open ports, password policies, installed software, and firewall/antivirus status.
- Integrated detection of weak configurations and suspicious processes.
- Designed a dashboard-based report with risk scoring and prioritized security recommendations.

INTERESTS

- Reading
- Dancing
- Exploring Cybersecurity Trends
- Bug Bounty Hunting

LANGUAGES

- English
- Telugu
- Hindi

WoU-SoT Scanner
Tech Stack: Bash Script, Kali Linux
August 2023 – December 2024

- Developed WoU-SoT Scanner, a port scanning tool for basic network analysis.
- Simplified the use of Nmap by providing an intuitive, GUI-based command-line interface.
- Enabled users to perform quick and effective port scans without complex syntax.

SKILLS (CORE CYBERSECURITY & QA)

- **VAPT -** Kali Linux, SQLMap, Burp Suite, Nmap & Nikto (Network Scanning), OWASP ZAP & Nessus (Vulnerability Assessment)
- **SOC/Incident Response -** Splunk (Log Analysis & Alerts)
- **GRC -** ISO 27001 (Security Auditing), PCI DSS, HIPAA, GDPR
- **Digital Forensics -** Autopsy, Steganography
- **Threat Hunting & Intelligence -** MITRE Attack Mapping
- Pursuing certification in **API Security by APISEC** (authentication, authorization, OWASP API Top 10) & in **Cloud Security by Google**
- **Quality Assurance (QA) -** Manual testing, Automation testing (using Selenium for UI Testing, Postman for API Testing), Test Case Design, Bug lifecycle management, Functional Testing, and Bug Reporting

RESEARCH & PUBLICATIONS

- **Identification of Bacterial Leaf Blight Disease in Paddy Crop**
  - Presented at ICSSCGE 2024 (International Conference on Smart Sustainable Computing for Green Environment)
  - Status: Published as a Book Chapter (Chapter Twenty-Eight) in the Book *"Sustainable Smart Computing and Green Energy"* under Cambridge Scholars Publishing
- **AI-based Fake OTP Detection: A Systematic Review and Proposed Detection Framework**
  - Presented at the International Conference on Sustainable Science and Technology for Tomorrow (SciTech-25)
- **Book Chapter: AI in Fraud Prevention and Risk Mitigation**
  - Submitted a book chapter for the book *"AI and Innovation in Security Management Systems"*

ACHIEVEMENTS

- Responsibly disclosed bugs in 2 government websites and got acknowledged by the Indian Government.
- Class Representative – B.Tech CSE (Blockchain, IoT, Cybersecurity), 2022–2026
- Placement Committee Member at Corporate Relations, Woxsen University.
- Teaching Assistant - Awarded as one of the Best Peer-to-Peer Mentors, School of Technology, Woxsen University
  - Mentored and guided 2nd-year students in Cryptography Lab
- Executive Council Member of ERS-SOT Council (Ethics, Responsibility & Sustainability at School of Technology)
