Rahul Samineni

B.Tech CSE - BIC (Blockchain, IoT, Cybersecurity)

Objective

Rahul Samineni is a Cybersecurity Enthusiast and Third Year Engineering Student studying at Woxsen University. Currently working as an ERS council at Woxsen University. Rahul is passionate about the latest trends and technologies in the field. He is knowledgeable about the fundamentals of security, incident response, web application security, and Cyber Attacks. With his commitment to learning and growing, Rahul is eager to use his skills and knowledge to create value for his team. His enthusiasm and expertise make him a great asset to any team he is part of.

Projects

Project 1 - DEVELOPER (AI Developer)

•Developed a custom GPT model using transformer technology.
•Fine-tuned it on Shakespearean text for stylized responses.
•Deployed on Streamlit for interactive user testing.

Project - 2 - DEVELOPER (Computer Vision Project)

•Utilized OpenCV to process live camera feeds of parking spaces.
•Built a model to detect if each parking spot is occupied or vacant Deployed on.
•Streamlit to display real-time updates of available spots and their locations.

Project 3 - DEVELOPER (AI Developer)

•Developed a stable diffusion model.
•Made use of car datasets to generate new car images with prompts.

Project 4 - DEVELOPER (AI Developer)

•Developed an intelligent multi-agent system using Crew AI for automating resume screening and candidate-job matching in a recruitment platform.
•Designed and orchestrated 3 specialized agents: a Resume Extractor, Job Matcher, and Communication Agent, each handling distinct tasks collaboratively.
•Integrated Gemini API to enable natural language understanding and generation for high-quality, context-aware responses.
•Tech stack included Python, Crew AI, and Gemini API, focusing on efficient and scalable AI-driven recruitment workflows.

Project 5 - DEVELOPER (AI for Cybersecurity)

•Fine-tuned Gemini API using curated cybersecurity datasets to enhance its ability to detect and understand web vulnerabilities.
•Built an automated testing framework that utilized the fine-tuned model for vulnerability scanning, payload crafting, and exploit simulation.
•Tested on Damn Vulnerable Web Application (DVWA) to validate the system's effectiveness across various attack vectors like XSS, SQLi, and command injection.
•Tech stack included Python, Gemini API, DVWA, and custom automation scripts for real-time vulnerability analysis.

Certifications

•Oracle Cloud Infrastructure 2022 Certified Foundations Associate.
•Blockchain Basics.
•ISC2 Certified in Cybersecurity Convolutional
•Neural Networks and natural language processing in TensorFlow

Academics

Woxsen University | Hyderabad *2022 - 2026*
Bachelor of Technology - 3.3/4.0 CGPA
Indian Language School | Nigeria *2008 - 2022*

Skills

- Programming Languages: Python, Java
- Database Management
- Static & Responsive Website Building
- Cybersecurity
- IoT
- Blockchain
- Tokenomics
- 3D Designing
- Bash Scripting
- LLM Fine-tuning and Optimization

Tools

- MySQL & MongoDB
- HTML, CSS & Tailwind
- Splunk
- Autopsy
- Arduino IDE
- Figma, Canva
- Yolo, Langchain
- React JS, Streamlit
- React-Native
- Solidity
- CrewAI
- Windsurf, Cursor AI
- Pytorch

Languages

English - Fluent
Telugu - Fluent
Hindi - Fluent

Professional Skills

Flexibility
Planning and Coordination
Teamwork and Collaboration
Critical Thinking
Decision-Making
Emotional Intelligence
