Professional Summary

Associate Data Scientist with hands-on experience in building predictive and prescriptive machine learning models using **Python, Scikit-learn, TensorFlow,** and **SQL.** Experienced in **data preprocessing, feature engineering,** and **model evaluation on large datasets**. Proven ability to translate business problems into analytical solutions and communicate insights to technical and non-technical stakeholders through dashboards and reports.

TECHNICAL SKILLS

- **Languages:** Python, SQL, Java, JavaScript.
- **ML & AI:** Deep Learning, NLP, Predictive Analytics, Model Evaluation, Feature Engineering.
- **Data Science:** Pandas, NumPy, Scikit-learn, Power BI, Data Visualization, EDA.
- **Frameworks**: TensorFlow, Keras, PyTorch, XGBoost, OpenCV
- **Web Dev:** HTML, CSS, Django, Streamlit, React (Basics).
- **Tools:** MySQL, Git, GitHub, Postman, VS Code, Jupyter.

INTERSHIP EXPERIENCE

1.Zaalima Development —Associate Data Scientist Intern (Team Lead)

May 2025 – August 2025

- Led a 4-member team to build **AI & ML projects** including **Fraud Detection, AI Resume Screening, and Predictive Maintenance** Systems.
- Engineered a data pipeline, preprocessed 1M+ data points and trained 10+ machine learning models (XGBoost, SVM) achieving 95% accuracy in predicting customer churn; model is now used by over 12 employees across CX teams
- Utilized **Python, Scikit-learn, TensorFlow, NLP tools, and SQL** for model development and performance optimization.
- Presented model insights and performance metrics to non-technical stakeholders, supporting data-driven decision-making.

Tech Stack: Python, Pandas, NumPy, Scikit-learn, TensorFlow, XGBoost, NLTK, SQL, Streamlit

2.Bluestock Fintech — Web Development Intern (Team Lead, 10 Members)

May 2025 – June 2025

Project: IPO Web Application & REST API Development

- Translated business and compliance requirements into data-backed API solutions, improving data accessibility for internal stakeholders.
- Led a team of **10 interns**, delegating tasks and unblocking other team members, resulting in the on-time delivery of the **project goals,** and was the most junior team member.
- Directed both **frontend and backend development** using **Django, Django REST Framework, PostgreSQL, HTML, CSS, and JavaScript.**
- Developed the most complex module in the application: the document handling **REST APIs** for prospectus PDFs; this module was crucial for compliance and data accessibility.
- Collaborated with the **Project Manager** for weekly progress reporting, testing, and deployment readiness.

Tech Stack: Python, Django, DRF, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, Git, Postman, Figma, Notion

EDUCATION

Woxsen University, Hyderabad **May 2022 - Ongoing**
CSE Specialization in Artificial Intelligence and Machine Learning

PROJECTS

1.Credit Card Fraud Detection

Tech Stack: Python, Scikit-learn, Flask, Pandas, NumPy, Matplotlib

- Built an **ML-based fraud detection** system on 2.8L+ transactions using Random Forest and XGBoost.
- Handled class imbalance using **SMOTE**; achieved **AUC of 95%.**
- Deployed model using Flask for real-time predictions.
- Built a **machine learning system** to detect fraudulent transactions from a dataset of 2.8L+ records.

2.DeFi Wallet Credit Scoring (Aave V2)

Tech Stack: Python, Pandas, NumPy, Scikit-learn (MinMaxScaler), Matplotlib, Seaborn, JSON

- Built a **credit scoring model** for DeFi wallets using **Aave V2 transaction data.**
- Extracted wallet behavior features and computed **risk scores (0–1000)** using **Python and Min-Max normalization.**
- Analyze score distribution and wallet patterns with **Pandas, NumPy, and Matplotlib** in **Google Colab.**

3.Stock Price Prediction using LSTM

Tech Stack: Python, TensorFlow, scikit-learn, Streamlit, Yahoo Finance API

- Predicted **Cochin Shipyard Ltd (COCHINSHIP.NS)** stock prices using **LSTM** and **Linear Regression** models.
- Implemented **7-day moving average** and **MinMax scaling** for trend-based forecasting.
- Analyzed model performance using **RMSE**, leading to a refined algorithm that improved predictive accuracy by 25%; visualized outcomes through a customized **Streamlit** dashboard that enhanced stakeholder decision-making processes..
- Designed a data integration layer using the **Yahoo Finance API** to automate the ingestion of the live market data; facilitated faster decision-making across 3 protfolio management teams.

CERTIFICATIONS

Certification by Google for **Google Data Analytics**.
Certification by Coursera for **Microsoft Power BI**.
Certification on **AWS Cloud Practitioner**.
